Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4, 8, 12 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by Ripley et al. (US Patent 5,350,140).

Ripley et al. discloses an appliance and a method of assembling appliances wherein a plurality of control consoles with different control features can be mounted to base units of appliances to produce different appliance models, see column 1, lines 47-58, column 2, lines 11-19 and 41-65 and column 5, lines 22-43. Applicant should note that it is inherent that depending on the features needed for a particular model, some of the electrical components may not be electrically connected or all of the electrical components will be connected.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3726

4. Claims 5-7, 9-11 and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ripley et al.

Ripley et al. discloses a method of assembling appliances as shown above except for the console mounting being done at a retail establishment, by an appliance dealer, at the purchaser's home, by a dealer representative or at a regional warehouse. However it would have been obvious to one of ordinary skill in the art at the time the invention was made that having the mounting of the console done at a retail establishment, by an appliance dealer, at the purchaser's home, by a dealer representative or at a regional warehouse is an obvious matter of design choice wherein no stated problem is solved or unexpected results obtained in having the control console mounted in one place or another. Furthermore the control console of Ripley et al. could be mounted at any of those locations.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
